

Earning trust every day.

When failure is not an option.

At Premiere Communications and Consulting, Inc., we are in the business of designing, building, and maintaining complete IT infrastructures and unified communications systems for organizations that want it done right the first time.

Since 1993, we've proven ourselves with some of the largest business campuses in the Southeast. We also help small businesses that wish to outsource the design, management and maintenance of their IT solutions. No company or challenge is too large, small, or complex for us to serve.

Our team of engineers, designers, field technicians and highly trained staff work tirelessly to ensure the successful implementation you require. We listen better, work harder, and promise to do all we can to exceed your expectations. And our focus on customer service and a personalized consultative approach means an enjoyable experience from start to finish.

DESIGN | BUILD | MAINTAIN

OUR MISSION

Our mission is to earn the trust and loyalty of our customers and employees by successfully leveraging our experience and resources to design, build, and maintain powerful IT solutions.

DESIGN

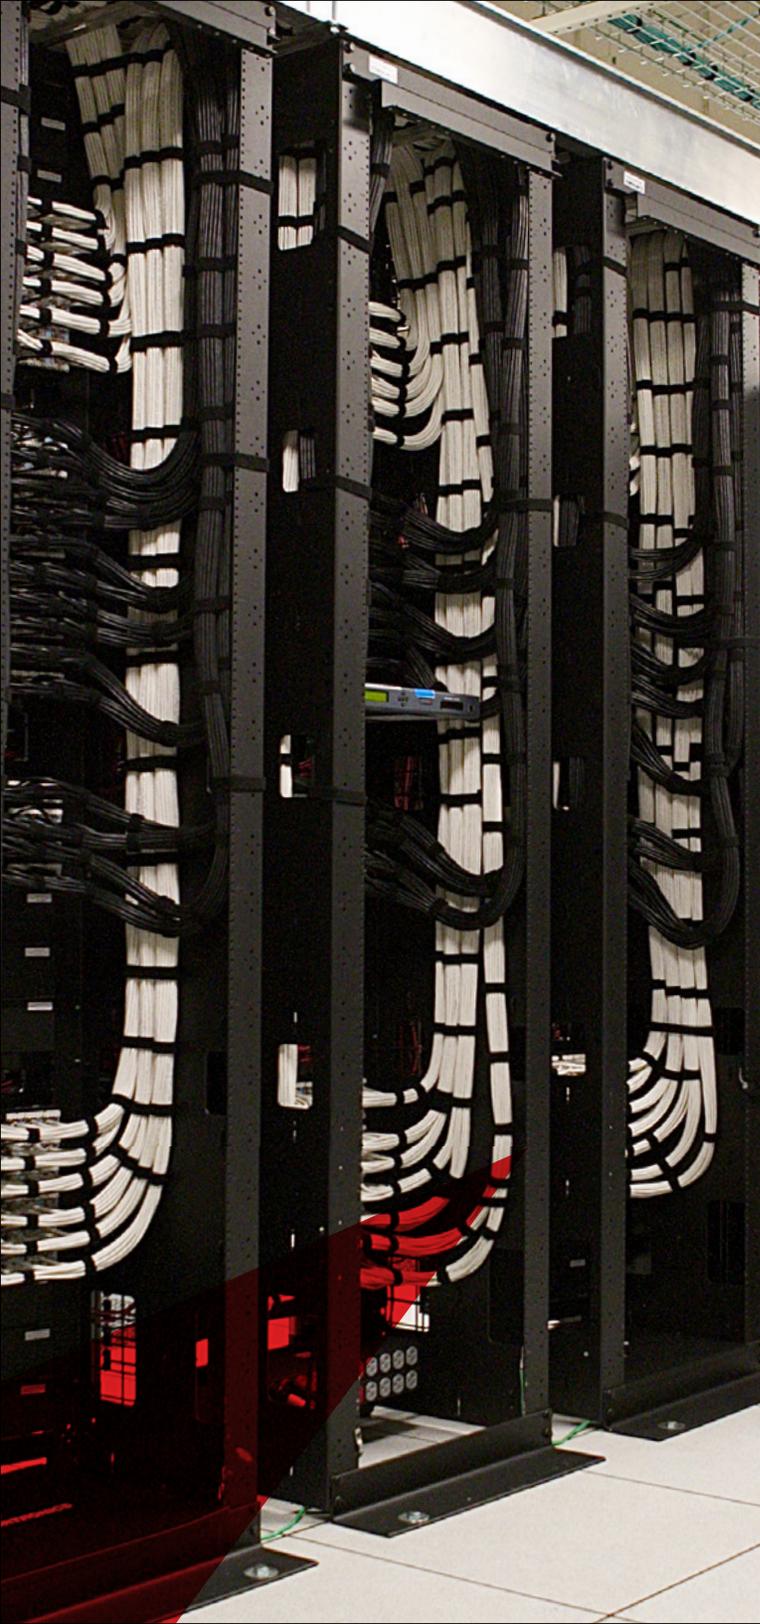

BUILD | MAINTAIN

Mission-critical design services.

We understand that deploying a thoughtfully designed IT solution is critical to the long-term success of an organization. Our experienced technologists serve as trusted advisors, helping guide organizations to the IT solutions that best meet their needs. We employ full-time CAD specialists who perform key assignments such as:

- Designing the Structured Cabling Infrastructure that supports the equipment in your data center
- Designing enterprise services such as wiring your office spaces for Layer II Wireless, IP Telephony, Paging, Cellular Enhancement, IP Security and fiber-optic Passive Optical Networks (PONs)

At Premiere, we can offer you “big firm” capabilities with the personal attention you would expect from a smaller company. No design project is too large, too small, or too complex. And no detail of design is left uncovered.

DESIGN

We do it all. And we do it well.

STRUCTURED CABLING

A Structured Cabling System (SCS) provides a universal platform upon which an overall IT strategy is built. Premiere can help you implement the best solution as it relates to your facility life cycle and your specific IT strategy. We take each client's specific requirements, conditions, and future plans into consideration. Of course, all of our structured cabling projects follow the BICSI installation guidelines for horizontal and backbone distribution transport systems, and we're certified to support all the major tier one solutions in our industry today.

WIRELESS SOLUTIONS

Premiere Communications and Consulting is prepared to add wireless capability to your existing computer network. Wireless networks add the ability to increase productivity by allowing employees the flexibility to be mobile throughout an entire office complex.

IP SECURITY SOLUTIONS

Premiere Communications and Consulting designs, installs and services video, voice and data systems for physical security to a variety of organizations. These critical services can include access control, HD Video/CCTV, intercom, emergency call/evacuation and optical turnstiles.

PASSIVE OPTICAL NETWORKS

Virtually everyone who works in an office environment is struggling with the enterprise-wide mandate to do more work with less money and resources. Implementing a Passive Optical Network (PON) is a green, energy-efficient solution that reduces capital and operating expenses. It's passive in that the optical transmission has no power requirements or active electronic parts once the signal is going through the network. Premiere installs passive optical fiber LAN solutions to interconnect stationary Ethernet-based systems, such as end-user devices, access points and wireless controllers, application servers and printers.

CELLULAR ENHANCEMENT

Cellular Enhancement Systems, also known as Cellular Repeaters/ Boosters, are a telecommunications solution used to extend and distribute the cellular signal of a given Mobile Network Operator (MNO) within a building. Premiere most often offers the Cellular Enhancement/ Cellular Repeater Option for clients where the cost of a full-blown DAS implementation is cost-prohibitive. It is a cost effective and easily deployed system for isolated sections of a building, or small build-outs where coverage is an issue.

PAGING & SOUND MASKING SYSTEMS

Premiere is pleased to offer the design and installation of loudspeaker paging and sound masking systems, a complementary service to Voice over IP initiatives. We have the expertise and partnerships with the leading paging and sound masking manufacturers so you can be assured your investment in these technologies will live up to your expectations.

TELEPHONY

Business telephone systems are key tools for every business, providing the ability for staff and customers to communicate with each other. Premiere Communications and Consulting will work with you to understand your requirements and to optimize and customize your telephone system to suit you.

AUDIO VIDEO SOLUTIONS

In business today, being able to engage and hold the attention of your customers and your own internal organization is critical to success. You need high-performance communication technology to do it. Premiere can engineer comprehensive audio-visual solutions to meet your needs. Once installed, our dedicated service team is here to support you throughout the lifetime of your system. Our AV Solutions Include:

Video Conferencing
Meeting Room Control Solutions
IP Based Lighting Solutions

Video Displays
Digital Media
Audio Systems

MANAGED SERVICES

Sometimes referred to as Staff Augmentation Services, our Managed Services provide you with mission-critical IT staffing at your company to handle ongoing or short-term needs on-site. These IT specialists work as employees of Premiere but report to your management.

Managed Services fill an unmet need in many cases, such as at small companies that don't have or wish to staff full-time IT personnel, or at larger clients who need to expand their facilities onto new campuses. Our recruitment team specializes in technical staffing, including Project Management, Network Engineering, System Administration, and Storage Engineering. Let Premiere be your professional staffing agency for the IT space.

So you can sleep better at night.

DEDICATED SERVICE GROUP

We have developed a streamlined process to be able to respond quickly to client needs and provide fast turnaround. Our Service Group is staffed with our most senior employees who know how to troubleshoot. They handle all levels of issues, from simple wiring of telephony to high-bandwidth connections in the main data center.

OUR #1 FOCUS

We're committed to providing you with the service you need, when you need it. Service professionals can be on-site within 3 days — or within 4 hours on an emergency basis, whether the issue to be resolved is inside or outside the plant.

MAINTENANCE SERVICES

Premiere's Maintenance service handles all of the "health and ongoing operations" needs of IT installations. Typically this will be comprised of multi-year maintenance agreements for the Layer II products and services that we install. All of our installations of Layer II products such as telephony, wireless, and security equipment, have regular maintenance agreements. These are critical, industry-standard offerings.

Data Center.

CAPACITY PLANNING

Analyzing current datacenter capacity in line with demand for new services, we can help you keep control of hardware utilization, power management, and timely hardware orders to ensure effective project delivery.

MATERIALS AND ASSET COORDINATION

Management of physical assets going in and out, including RFID solutions in Tier IV data centers.

We can provide solutions involving access management and change control to ensure minimal disruption in a business critical environment.

For mission-critical assignments, remember not all staffing services are the same. Because IT is our only business, the staff we provide has much more experience than the people you may find through generalist staffing agencies.

How can we help?

Premiere Communications is positioned to grow with the pace of technology and with the needs of your company. Let's talk about your IT needs today.
